

### Capstone Proposal

- This project is going to be a website that allows the user to design their own shoes (hopefully there will be a wide range of shoes)
  - My project is unique because you will be able to design your own shoes in any way you want
    - I am going to use Atom(html, java, css, maybe php)
  - I think the most challenging part of this project is going to be making the shoes change to the custom colors and directions
  - There is going to be a background color with multiple font and my very own monogram made by me
    - Milestones
1. Design the layout of the home page(1 day)
  2. Make a nav bar that has clickable links(less than a day)
  3. Make a login page/registration page, make a registration page(1 week)
  4. Start working on the design page(less than a day)
  5. Add the tennis shoe to the page(2 days)
  6. Find different colors and patterns(less than a day)
  7. Work on getting each part of the shoe to change to a different color or pattern; I don't know what auto design is, reference a shoe website that allows you to customize shoes(2 weeks)
  8. Allow the user to click a button that will design a specific part of the shoe(1 week)
  9. Allow the shoe to be saved based if logged in(3 days)
  10. Add the heels to the page(2 days)
  11. Find different colors and patterns(less than a day)
  12. Work on getting each part of the shoe to change to a different color or pattern(2 weeks)
  13. Allow the user to click a button that will design a specific part of the shoe(3 days )
  14. Make the picture change colors based on what the user has inputted(3 days)
  15. Allow the shoe to be saved if a person is logged in(3 days)
  16. Add the boots to the page(2 days)
  17. Find different colors and patterns(less than a day)
  18. Work on getting each part of the shoe to change to a different color or pattern(1 week)
  19. Allow the user to click a button that will design a specific part of the shoe(1 day)
  20. Make the picture change colors based on what the user has inputted(1 day)
  21. Allow the shoe to be saved based if logged in(1 day)
  22. Add the purchasing option to the website(1 week)
  23. All the customer to talk to a representative(2 weeks)
